

MIKSGROW

MXY

PEAT-FREE

Seedling Substrate

Miksgrow MXY is a high-performance, **peat-free substrate designed to provide a great environment for seed germination and early plant development.**

This ready-to-use substrate has an advanced structure with high porosity and aeration, even under compacted or saturated conditions, ensuring healthy root development and even water distribution.

Miksgrow MXY supports sustainability without compromising quality and is a reliable, eco-friendly solution.

It is suitable for seed germination and young plant growth.

Why MXY?

- ✓ **100% peat-free, low-carbon, reducing emissions**
- ✓ Fine, advanced texture allows good seed-to-substrate contact and easy root penetration
- ✓ High porosity and excellent aeration promote **strong and healthy root development**
- ✓ Ensures **even water distribution**, minimizing the risk of waterlogging
- ✓ **Efficient re-wetting** allows the substrate to quickly absorb water, even when dry
- ✓ **Faster surface drying** helps reduce the risk of algae and mold
- ✓ Lightweight and compressible, allowing more trays per bag and **better transport efficiency**
